Powers

Elektra was resurrected by the Hand giving her a connection to the demon known as the Beast. This process gave her various enhanced abilities

- **Mind Switch:** Elektra's strangest gift is her ability to "throw" her mind into those of others. For instance, she was able to track down her enemy, Ken Wind, by temporarily "borrowing" people's minds and acting through them while she hunted around for her prey.
- **Discern Target:** This temporary mind control enables her to literally sniff out the psyche, or intent, of her targets. It saw extensive use during Elektra: Assassin, in which she was heavily reliant on only her ninja powers. It is unknown how long the effect lasts, but Elektra has gone a full two days or more in another person's mind while they zoned out in hers.
- **Discern Location:** This "mind jump" ability might explain why Elektra is always a step ahead of her competition, or seems to know where her target is at all times. An extreme example would be the time she murdered an ambassador in South America. The man was sitting against the wall when Elektra sought out his mind and trusted her katana to enter his heart in the perfect spot. Unerringly, it did: the sword pierced through thick walling and the politician was slain where he sat. The unusual addition of her telepathic skills make Elektra an accomplished assassin to say the least.
- **Heightened Awareness:** Demonstrated the ability to detect a threat to her well-being in the immediate vicinity before they commit the action.
- **Telekinesis:** Elektra has demonstrated telekinetic abilities.
- **Telepathic Communication:** She can communicate telepathically with individuals possessing similar levels of mental discipline, such as the Chaste.

- **Precognition:** She can have some precognitive visions, and see glimpses of future events.
- **Mind Shield:** Elektra has demonstrated an ability to remain hidden and undetected by other telepaths. By using a telepathic technique that she learned during her time with the Hand, Elektra can create a mental shield around her mind keeping herself hidden from not only other psychics but mind locating machines like Cerebro.
- **Silent Scream:** A high powered Chi based scream originally used by Shang-Chi, By focusing on her Chi and puckering her lips together Elektra can use this technique to perform a high pitched scream that can render a person permanently deaf, and/or by furthering focusing on one target can kill.

Abilities

Master Martial Artist: Elektra is proficient in many martial arts originating from China, Thailand and Japan. While many of them are unstated, Ninjutsu is the most noticeable one. She won trophies in aikido, kendo, karate.

Peak Human Physical Conditioning: Elektra is an Olympic-level athlete and gymnast. She had won competition in both swimming and track from an early age.

Weapons Master: She is a master of many different weapons. Among the known are Okinawan Sai which are her usual weapons of choice (it is presumed she may have trained with all Okinawan Kobudo weapons), katanas, knives, sansetsukon (3-sectional staff), and (shuriken) throwing stars.

Stealth: Due to her ninja training, she can blend in with the shadows and remain undetected by most humans.

Skilled Acrobat: She is an excellent acrobat capable of many difficult feats..

Expert Marksman: Elektra is skilled with throwing weapons and sharpshooting.

Nervous System Control: She can control her nervous system enabling her to deaden her body to physical pain, control her emotions, and even her bleeding rate.

Pressure point locator: She can locate different pressure points on a person's body. She can incapacitate, paralyze, severely injure, or kill a person.

Strength level

Elektra trains daily and has exceptional strength. She possesses the normal human strength of a woman of her age, height and build that engages in intensive regular exercise. While the exact amount of weight she is ultimately lift is unclear, she is at least able to lift 260 lbs, which is twice her own body weight. Marvel Official handbooks classify her as Athlete.

Weaknesses

Psychic Feedback: It is unclear what the limitations on her psychic ability are. She may be limited by touching distance or to minds easily affected by persuasion; the last time Elektra tried this trick, it was with S.H.I.E.L.D._Elektra was not born with this interesting gift: she mastered it through training and refinement with The Hand. Their fighters share similar powers, which means each of them -- including Elektra -- are mentally linked to The Beast, the relentless demigod of The Hand who has haunted her since she broke rank.

Paraphernalia

Weapons

Twin Sai: Elektra's primary weapons are her twin sai, long daggers with narrow blades and twin blade guards. She can use them to slash, stab, and throw. Her Sai are protected with synaptic snare with bio-metric locks keyed to her nervous system that will deliver a shock that paralyzes any other person who touches it for sixty seconds, to ensure nobody can use them against her again.[57]

She is also proficient with the katana, sansetsukon (three-sectioned staff), and other martial arts weapons

BACKGROUND:

Elektra Natchios was born on a Greek island near the Aegean Sea to Hugo Kostas Natchios and his wife Christina Natchios. She grew up with her older brother Orestez Natchios. Elektra's mother was gunned down by enemies of her father while vacationing on a yacht. After her mother's death Elektra grew up close to her father but was plagued by visions and voices with no known source. Her father eventually sent her away to psychotherapy until becoming more stable. As she grew up, her father required that she train in the martial arts where she excelled.
