

# Invisible Woman

Real Name: Susan Storm Richards

## Appearance:

Gender female

Race Human

Radiation Height 5'6

Weight 120 lb

Eye color blue

Hair color Blond

## Work Occupation

Member of the Fantastic Four, financial manager for Fantastic Four Inc, occasional model and actress

Base: Pier Four, New York City

## Powers and Abilities:

Can become [invisible](#) at will (even to non-visible portions of the electromagnetic spectrum), can make other objects and individuals invisible, [forcefield](#) generation and manipulation, can make invisible things visible, extremely fine forcefield control capable of making them either visible or invisible, and in any shape or size she can imagine (limited by her power, for example she can't make a planet-size forcefield, at least I don't think so), forcefield control effectively simulates energy constructs, [telekinesis](#), and [flight](#), can [absorb](#) and redirect [light](#), can make an enemy's eyes invisible, blinding them. Her forcefields can block telekinesis, telepathy and other psionic powers, and exotic dimensional/spacetime abilities, at least to some extent.

**Weaknesses:** She is only [peak human](#) in stats without her force fields, if she loses concentration her force fields will dissipate.

**Destructive Capacity:** Planet level+ (comparable to [The Thing](#) and [Human Torch](#) due to sometimes being considered the most powerful Fantastic Four member), many of her attacks ignore conventional durability

**Range:** Several kilometers

**Speed:** Peak human, significantly faster when traveling on her forcefield constructs, [hypersonic](#)+ [reactions](#) (at least 4-digit mach)

**Durability:** Peak human, small planet level+ with her forcefields

**Strength:** Peak human, can amp herself to 100+ tons with forcefields

**Stamina:** Above peak human

**Standard Equipment:** Her suit, which is specially made so it can turn invisible along with her.

**Intelligence:** Very good [HtH](#) combat skills, experienced with using her powers and fighting many different types of foes, good leadership ability (she often acts as the leader of the FF when Reed isn't available)

### **Notable Attacks/Techniques:**

- Brain Bubble: Sort of a misnomer, as this technique refers to creating a forcefield anywhere inside of the opponent's body (usually the head) and expanding it, causing them to explode from the inside
- Suffocating Bubble: Creates a forcefield around the opponent's face or head, cutting them off from oxygen and causing them to pass out. Usually used as a non-lethal method to subdue an opponent
- Sphere barrage: Fires a barrage of sphere-shaped forcefields that can trip up an opponent or impact them with kinetic energy
- Spike ball: Creates a spherical forcefield around herself, then creates many sharp spikes all over it, impaling anyone or anything nearby
- Compression: She can create a forcefield around a target and compress it, producing

pressure approaching that of a black hole

- Blinding: She can make an opponent's eyes invisible, rendering them blind for as long as she wishes
